

WEBMETRICS[®]
A Neustar[®] Service

Web Performance Solutions

Neustar's Webmetrics services enable companies to identify, solve and prevent web performance issues by providing collaborative monitoring solutions and expert consultative services.

Webmetrics' powerful and innovative web performance management solutions help companies ensure on-line performance, competitive advantage and a positive end-user experience.

Webmetrics GlobalWatch Performance Monitoring Services

External monitoring, from the point of view of your customers, is critical to ensuring that your end users are happy and your revenues secure. Webmetrics' GlobalWatch maintains a vast network with agent locations all around the world, which monitor your sites and applications and provide a precise, unbiased "end user perspective" on your performance.

GlobalWatch is the premiere hosted (SaaS) monitoring platform that tests, monitors and measures the performance of websites, web transactions, web services, network services and streaming media. Real-time alerts help you solve problems before customers are impacted, and actionable reports and analysis allow you to better plan for future performance.

Application
Monitoring

Application Monitoring:

Track and report on web transaction performance, whether simple or complex

Webmetrics Application Monitoring allows you to track the performance of your critical web applications and transactions from all over the world and instantly know when your application is down. This service simulates defined web transactions, such as customer logins and purchase order fulfillment, as frequently as every minute. Webmetrics supports the most complex web transactions, including Web 2.0, Ajax, and plugin-based applications such as Flash and Java. Our RIA monitoring platform captures the "browser fidelity" of an authentic end user experience, utilizing an Internet Explorer[®] 7 browser.

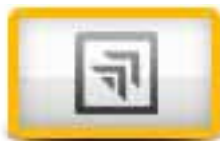

Site
Monitoring

Website Monitoring:

Be the first to know when your website is down or not performing

Protect your brand, safeguard your revenues and improve uptime with Webmetrics Website Monitoring services. This service ensures your site is up 24/7, with monitoring up to every minute from locations across the globe. Detailed performance breakdowns are provided, such as DNS time, time-to-first-byte, and transfer time.

Web Services
Monitoring

Web Services Monitoring:

Track the performance and uptime of your APIs

Webmetrics Web Services Monitoring allows you to monitor the glue that holds your infrastructure together by tracking the performance and uptime of your APIs and those of others you may rely on. Whether it is a multi-step transaction, or a simple web service request, we have you covered.

Ecosystem
Management

Ecosystem Management:

Share and collaborate with customers and suppliers

Webmetrics Ecosystem Management provides a holistic viewpoint from which a company can manage its entire service delivery environment. It offers a transparent view between stakeholders so that issues can be pinpointed quickly, and also provides a simple method for collaboration so problems can be resolved rapidly.

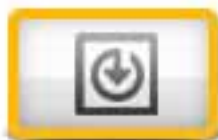

Streaming
Monitoring

Streaming Monitoring:

Monitor streaming media quality from all over the world

Ensure the quality of your video and audio streams, keep your visitors happy, and protect your image with Webmetrics Streaming Monitoring. Specify the length of time to watch a stream and set thresholds for connection timeout, buffer timeout, stream quality (in terms of minimum expected throughput) and stream quality (in terms of maximum number of rebuffer events).

Network Service
Monitoring

Network Services Monitoring:

Monitor DNS, FTP, PING, POP3, PORT and SMTP availability

Externally monitor your key services with Webmetrics Network Services Monitoring. Monitor DNS, FTP, Ping, POP, and SMTP protocols to ensure availability and connectivity. With our easy-to-use online Web Console, you have access to all of your monitoring settings anywhere, any time.

Webmetrics SiteStress Managed Load Testing Services

Save Time and Money with a Fully Managed Solution

Webmetrics' SiteStress Load Testing service helps prevent site crashes and downtime by giving you a clear understanding of where your bottlenecks lie, what load your application can handle, and expert advice on how to scale further. Our fully managed load testing services means we will handle the details so you can focus on the big picture. Webmetrics works with you to gather requirements, define scenarios, run a series of tests, and review what the results actually mean. The SiteStress service includes your own personal dedicated load testing engineer, concise, clear reports and analysis, plus expert consultative advice and recommendations.
